Source: Compiled from National Bureau of Statistics of China *China Statistical Survey 2005*, *China Statistical Yearbook 2004*, statistical yearbooks for each year published by the bureaus of statistics of each province and autonomous region, and the *2004 Economic and Social Development Statistical Bulletins* (national edition and editions for each province and autonomous region).

Note: N.A. = no data

GDP and per capita GDP are calculated by dividing the local currency by the average exchange rate for that year

The investment rate is calculated by dividing the value of fixed asset investment by GDP
